

Dear Representative \_\_\_\_\_,

I understand that the Pentagon is proceeding with plans to base offensive and defensive weapons in space as a part of the (still unworkable) "missile defense" system. Please let me know what you are doing to oppose these programs. They will almost certainly lead to a costly arms race in space, to war in the heavens, and even to extermination of humankind.

I urge you to consider co-sponsoring H J Res 2420, introduced in the House on May 18, 2005.

This bill calls for

- Reaffirmation of the national Aeronautics and Space Act of 12958 stating that it is the policy of the United States that activities in space should be devoted to peaceful purposes for the benefit of all mankind.
- A ban on weapons in space.
- An international treaty banning space based weapons and the use of weapons against objects in space in orbit.
- This act does not prohibit use of funds for space exploration, space research and development, or other activities not related to space based weapons or systems.

Thank you for your timely response on this matter.
