Women, Environment, Sardegna

Press Release

“In front of the Ministry of Economic Development (Mi.S.E.) the Sardenian Committee of Women, Environment, Sardegna and of Clean Sardegna accompanied by Don Angelo Pittau with WILPF Italia, Women’s International League for Peace and Freedom, to present the project for the reconversion of the bombs factory RWN into a Regional Dairy Center”

Monday December 7 in Rome in front of the Mi.S.E., at 11.30 a.m. the delegations from Sardegna with Don Angelo Pittau and WILPF Italia, will present in a press Conference the project of the reconversion of a bombs factory very active in Sardegna.

The factory is the Rwm Italia (german property) that for years, violating the 185/90 Law, has found in Saudi Arabia, country on war, a formidable client that has purchased the deadly devices to be utilized in the slaughter of the civil Yemenite population.

The project will reconvert through the economical intervention of the Recovery Plan to support the reconversion into a agrofood industry, specifically a diary where the skilled workers of the Rwm, will be employed (after requalification) in the production of a wide range of cheese that will disengage the very low price of ovine milk from the unique utilization in the production of the Pecorino romano.

The Sardegna does not deserve and does not want anymore that! It is time to give back dignity to the workers of the Rwm and to contribute to obtain a prize of the milk respectful of the fatigue of the sardenian shepherds.

The project intends to be more a political than a technical proposal, because for its realization it is necessary a change of the course in foreign politics.

For this reason the project will be presented also to the Ministry of Foreign Affairs. Its authoritative authority (UAMA) in fact will soon have to make a declaration since there is an imminent expiry of the suspension of 18 months in the shipment of missils and bombs that was obtained by the Parliament with a great work so that even if only temporarily there was no complicity of the italian state in the Yemenite massacre.

We therefore invite the information media to be present at the event, sending then a report, therefore contributing to end the production of the killing agents. Work should produce Life not Death.

WILPF Italia, Clean Sardegna, Women Environment Sardegna, Don Angelo Pittau,
